# Problem Set 9 <br> Due Friday, December 7. 

## Algebra

Math 110A, Fall Quarter 2012

1. Do problems 5.3.1, 5.3.3, 5.3.8, 5.3.9 in the textbook.
2. Do problems 6.1.3, 6.1.10, 6.1.12, 6.1.39 in the textbook.
3. Let $R$ be a commutative ring with identity. Show that the set of nilpotent elements of $R$ is an ideal of $R$. This ideal is called the nilradical of $R$, denoted by $\operatorname{Nil}(R)$. (Hint: Problem 4 on Problem Set 4.)
4. Do problems 6.2.6, 6.2.11, 6.2.13, 6.2.20, 6.2.23 in the textbook.
5. Let $R$ be a commutative ring with identity. One says that $R$ is reduced if $\operatorname{Nil}(R)=\left\{0_{R}\right\}$. Show that the ring $R / \operatorname{Nil}(R)$ is reduced.
